Article Body:

Many items that we take for granted in the home have undergone major design changes in recent

To begin with, you need to understand the various features that are advertised by sales people

Fridge freezers will probably be one of the largest users of energy in your home - possibly se

The reason why fridge freezers use so much energy is because they are switched on all the time

Having an energy inefficient fridge freezer not only costs you money but also has an environme

Until the last 5 years or so many popular brands were extremely inefficient. The new energy ra

The ratings scheme grades every fridge freezer on the market, with an A++ rating being the mos

So, put simply, aim for an A++ or an A+ energy rating if you want to be kind to the environmen
