Here are a few important things to remember when filling out your pedigree chart:

Start with your name in line No.1.

Fill in all of the males on even numbers and all of the females on odd numbers.

When adding females, always use maiden names.

When writing dates, use the form 05 JAN 1945, not 1/05/45 or 05/1/45. The reason for this is b

Complete places with as much information as possible, even if it seems redundant or as a given

If you don't know the county or town, leave the commas with blank information. For example if

By following these standard guidelines, you'll be able to better understand some of the work t

Before getting to that stage, it's important to have at least your four-generation pedigree ch
