Procedure for safe asbestos bag disposal

1. Asbestos is fibrous in nature and these fibers easily float in the air. In order to make th
2. Purchase Asbestos Bags from the prescribed authorities .
3. Take two bags and place the damp material inside. You may also use a cardboard box inside t
4. Make sure that the bags are light enough to lift easily.
5. Seal the bags individually with duct tape.
6. Once the asbestos bags are ready for disposal, you need to fill in two forms ~
 - a. The Origin and Disposal Form
 - b. The Asbestos Certificate of Acceptance.
7. Give these forms to the Weigh Master on the day of disposal.
8. You may deposit these bags at the Sanitary Landfill site in Woodbine only.

Note: Find out the time of acceptance of asbestos bags in advance. You may use your own vehicl

Due to the harmful effects of asbestos exposure, it is essential that the entire community fol
