Article Body:

Are you looking for a good way to help your child grow? Have you ever thought about the benefits

There are many primary skills that a child can develop when constructing puzzles. Persistence

The most important thing to consider when picking out a puzzle is the age of your child. The p

Infants & Toddlers (0-2 years): 1-2 pieces

Young Preschoolers (3 years): 2-5 pieces

Older Preschoolers (4-5 years): 5-10 pieces

School-age (5+ years): 10+ pieces

Even though babies lack the hand-eye coordination to put a puzzle together, they are attracted

Puzzles with smaller pieces help older preschoolers to continue developing their skills by cha

Finally, one must consider the durability of a puzzle. The younger a child is, the more durabl
