razor,electric razor,shaving,shave,beauty

Article Body:

Razors have been around for a very long time, although electric razors didn't come into existence

Although there were early experiments with clockwork and friction motor, electric razors didn't

Schick had already invented a system where a person could insert new blades into a razor without

He sold his first electric razor in 1931 for \$25 in New York. In the same year he managed to sell

Schick's electric razor caught on, and by 1937 1.5 million were in use with its market worth \$

Of course competitors came out of the woodwork, and so did many patent infringements and lawsuits

The Remington 'Close Shaver' and the Sunbeam 'Shavemaster' were also launched in 1937. The latter

Two years later the Philips 'Philishave' launched in the Netherlands, using another technology

At the time the cutting area of these electric razors was quite small. In fact, they typically

Electric razor technology soon launched in Britain in the mid 1930's. Their names, such as 'Vik

The electric razor also gained popularity when Hollywood became involved. Seen in such films as

Throughout the years the electric razor greatly evolved. For example, models for women were de

These days dry shaving isn't necessarily the only option. Some can now be used in conjunction

Cordless, battery-operated models are also available.
