

Title:

Vertical Platform Lifts in Homes

Word Count:

261

Summary:

Vertical platform lifts are primarily used by individuals who use wheelchairs or mobility scooters.

Keywords:

vehicle ramps, wheelchair ramps, wheelchair lifts

Article Body:

Vertical platform lifts are primarily used by individuals who use wheelchairs or mobility scooters.

A vertical platform lift is designed to support the weight of a mobility device, such as a mobility scooter.

Since most vertical platform lifts are intended for outside use they are water resistant and weatherproof.

Vertical platform lifts are used by many millions of people. They are like having your own personal elevator.
