vital records, genealogy, ancestry, ancestors

Article Body:

Birth, Death and Marriage Records

The foundation of genealogy or family history research is birth, death and marriage records. I

The Social Security Death Records constitute a data base of around 65/70 million names, most o

Using these family search tools you should be able to:

- Distinguish between people with the same name
- Identify your ancestors
- Establish birth, death and marriage data, such as dates and places
- Learn the occupation and place of residence of ancestors
- Prove/disprove the validity of other records
- Find subtle clues to assist your research

If family history (genealogical research) is something that you are just beco

Next, if your parents are alive and you can meet with them face to face, take a piece of paper
