Article Body:

Once your child has been diagnosed with Attention Deficit Disorder, you may feel a bombardment

The first thing you should do to help your child is research ADD; learn everything you can about

You should also decide, with the help of your doctor, if your child should be medicated. This

Regardless of if you use medication, you should implement certain behavior therapy guidelines

You should be supportive of your child; you are their best advocate. In school, be sure they are

Help your child grow to be a confident and happy person. Acknowledge their strengths and tell

Consider joining a support group and seek out people that share your situation. Often the best
