Article Body:

Everyday, thousands of new surfers open their browsers for the first time, it is confusing in

Tip 1: Surf in security.

The first action that you will do if you are new to the net is to open your browser to surf. When you will discover Mozilla Firefox, you will be even more happy to surf on Internet, for s One of the first reason you should use Firefox is the integrated Firewall, which protect you a

Tip 2: No need to tape `http://www.---.com` all the time.

The second reason to choose Firefox is that you save time; for instance, when you went on ebay

Tip 3: See all your pages in only one window.

I really love this one; you can surf in tab. That is really powerful.

For instance, with Internet Explorer, whenever you click on a link, you have 2 choice: open th Let's explain: you are now looking yahoo.com, and you want to see the news, you just right cli Better, you can bookmark(in Internet explorer, bookmark is favorites) a tab, and open it later

Tip 4: All your downloads at the same place.

The fourth reason to choose Firefox is that when you download a file on your computer, sometim However, it is recommended, for the first time, to save your download on your desktop, then a

Tip 5: Don't forget a good anti virus,

While you surf on Internet, some hijackers will attempt to damage your computer, by introduc

There is a lot to learn when you start on Internet, but take your time. And everything will go
