Article Body:
Everyone talks online about how easy it is to build a website and make money online. Is is rea

All I have to say is that it is not that easy building highly profitable websites online. But,

To win online, you have to build a website that gets free traffic from the search engines, and

First you have to learn how to do your onsite optimization, and for that you will have to:

1) Insert your keyword into the title of your page

It amazes me how many sites online don't have their main keyword in the title page. Just make

2) Add Meta Tags

Not as important as it used o be, but I like to include it in every site I build. Add Descript

Use one or two keywords per page only. Add your main keyword into your page description.

3) H1 Header Tags

Use your H1 header tag on each page, I always like to use a smaller font size, like 14pt.

4) H2/H3 Header Tags

Try and use at least one H2 or H3 Tags within the first three or four paragraphs

5) Last and First Paragraph

Make sure to start your first paragraph with your main keyword and to end your last paragraph

6) Bold, Italize ad Underline your keyword

You must Italize and bold your main keyword just once, and you must use your main keyword to l

7) The Alt Image Tag

Well, this is very useful if you have pictures that you will be including on your site. Try to

Those are the only onsite optimization tips that you should use on each and every site you bui
