Article Body:

Adsense has several products under its belt and some are obviously more popular than others. W

Publishers only benefit from contextual advertising when visitors click on the ads on the web

In contrast, it is not easy to generate the same amount of revenue using other adsense product being made. Each search returns a set of relevant results and if there are ads for those keywo

It is even more difficult to convert visitors to revenue using Adsense referral products, alth the referral to the adsense program makes nothing.

Here's another example. The Adsense program pays a referral fee if a visitor clicks on a butto

So where does that leave publishers? Publishers want to promote the Firefox browser but what i

Still, there remains one small nagging problem. Implementing such a product will mean that Go
