If you are new to Internet Marketing and finding it difficult to get started, you're not alone

Many people think in order to start a business or sell a product they need a web site. The typ

- Find a product that can be sold or promoted. This can be anything from an affiliate program
- Build a website that requires finding a web hosting provider, design the site, and creating
- Promote the website and product by advertising, link exchanges and any other method that wi

If you take one part from each of the three processes above you will have: a product from join

The process now looks like this:

- Join a good affiliate program. This can be any kind of service or digital goods such as ebo
- Create informative quality content about the product.
- Promote the product.

The last step is the key on how to promote the product without a website. Instead of creating

Articles - Write an article by creating content which is relevant to the product. The most imp

Blogs - One of the hottest and effective method for selling. Best of all a website is not need

Advertise - Many people may opt not to advertise because of the costs, but if you plan your ad

Forums - Visit the online discussion forums where people in your target market like to gather.

E-Mail Signatures - Create an e-mail signature with your name, link, and a short tagline descr

These are just some methods you can use to market products with out a website. Start out with
