Article Body:

A fresh water fish tank requires about 30 minutes to an hour of work a week depending on the size

What you will need:

- 1) You will need a clean 5 gallon bucket that has never had chemicals or soap inside of it.
- 2) A hose or gravel cleaner
- 3) A bag of natural or synthetic sea salt

I have split the work into two parts the tank which needs to be cleaned every week on the same

The very first thing you have to do before you start cleaning your fish tank is to unplug your
