

Title:

How to Start your own Article Directory

Word Count:

532

Summary:

Are you tired of reading how to write and submit articles to a directory? Would you like to have an article is for you.

Keywords:

article, directory, directories, software, cajun, domain name

Article Body:

Are you tired of reading how to write and submit articles to a directory? Would you like to have an article is for you.

There's a few things to consider before putting an article directory together. Do you want to

Deciding on a domain name. If you're going for the niche directory you're going to want to pick a domain name. Let's say you're into cars, then you would want your domain to be something like articlesaboutcars.com

Now it's time to look into getting a web host. I know there are literally thousands of web hosts out there, but there are a few things you want to look for in a web host.

- \* Able to host multiple domains under one account
- \* Plenty of storage space
- \* Plenty of monthly transfer
- \* Able to have multiple email addresses
- \* Able to have multiple MySQL databases
- \* Customer service available through web, email, or phone

Search the Internet for web host reviews for more information. There are plenty of resources out there.

Next the software to run our directory. I use Article Dashboard. Article Dashboard is free software.

After following the directions for installing the directory it's time to get some articles. I have a few articles for you.

Well this is about all for now, please visit my site for more information, free articles and contact information.
