

Title:

What do you really need to go into business on the internet?

Word Count:

853

Summary:

There are some essentials you will need (assuming that if you are reading this that you already

Keywords:

internet business, make money online, internet profit, internet income, make money from home,

Article Body:

I have lost track of the number of discussion board posts and emails I have answered about this

There are some essentials you will need (assuming that if you are reading this that you already

What are the essentials?

Ground level approach:

Create a blog account at one of the free blogging sites available online (we used to use Blogger)

Now sign up for a free ClickBank affiliate account which will give you immediate access to some

That's it! You are now in business. Keep filling your blog and promoting it as well and you will

Shoestring approach:

This method is similar to the previous approach with one crucial difference -- you purchase your

Fast-track approach:

You host your own domain and offer your blog either as the site or as an addition to the site.

Penthouse approach:

You add one final tool that will make your internet business complete -- a mailing list tool.

That's it for just \$90 you can have every tool you need to make hundreds or even thousands from

Two final notes.

First, I did not include any budget in here for advertising because there are a lot of free ways

Second, if you plan to sell products yourself then you will need a payment processor. You can

Good luck with your new internet venture!
