Article Body:

Paulson Poker Chips have been around for many years. These are the number one poker chips in American. So what makes these chips more expensive and better than other chips?

Well, the fact that almost all the casino's in Las Vegas such as Mirage, Monte Carlo, Treasure Island, and Bellagio just to name a few use these chip. This is a pure clay poker chip and it's very hard to counterfeit these chips. Paulson poker chip is not only chip in the market that is pure clay and it's design and quality stands out among the rest. Most people think that this chips is made in American, but they are wrong these chips are manufactured in Mexico. Most of the chips that are in the market are manufactured in China. This is the only poker chip that is made in Mexico. Recently there's been an article out on Paulson Poker Chips that it may have led. What lot of people don't understand is that these chips have been around for many years in Vegas. If there was any signs of led we would of heard about it. However, the article that was written did not have any proof that Paulson Chips contained led. That article has had some impact on the poker chip market. AmericanGamingSupply.com which is the distributor of Paulson Poker Chips believes if Paulson Chips, the king of poker chips, has led then the materials of poker chips made in china should have more led because it not as heavily watched different designs such as the Top Hat and Cane, the Pharaoh's Club, the Top Hat and Cane World, and those chips are available without denominations. These chips are very distinctive because of the center piece being laminated. They are one of the best chips when it comes to sound and stacking up the chips. Because the chip is pure clay is not so slippery when you are shuffling the chips or doing tricks. This chip is manufactured and engineered by Paulson the undisputed leader in professional casino poker chip manufacturing.

This chip is the highest-quality clay available in the world.

Above all the same procedure is followed which means the control of our chips is the same way its manufacturers control genuine casino chips  
Multi-colored edge spot design w/ inlay that is sealed to the chip. No peeling or staining

With linen type finish

Can be cleaned with warm water and mild soap

Protection makes nearly impossible to take the logo off without ruining the chip

Tophat and cane icon is synonymous with Paulson quality and authenticity

So the next time your thinking of purchasing poker chips buy the best.

Paulson Poker Chips. AmericanGamingSupply.com also has other poker chips available such as the Nevada Jacks, ProGens, Ceramic Poker Chips, Clay Chips, and they focus on mostly poker tables. They take visa, mastercard, discover

card, american express and paypal payments. Don't forget to tell your friends because " what happens here, you'll tell your friends!"
