Keywords:

nailers, nail guns, tools, reviews

Article Body:

Unlike most tools, nailers are not meant for general purpose use - there is not an all-purpos

The types of nailers available are:

- Framing nailers: These are intended to drive bigger (1-1/2" to 4") box-type nails into large
- Finish nailers: These may be also called pin or brad nailers. They are designed for nailing
- Siding and Roofing nailers: These are intended for the specific task of putting up either s

Once you decide on the sort of nailer you need, some other characteristics that are useful to

- A directional exhaust output. When nails are driven in, air is expelled from the nailer. It'
- A large trigger. If you are going to be working with your nailer in cold weather, you'll wa
- A pivot on the air connector . If you move around often with your nailer, this will help red
- An easy-to-use depth setting. Nearly all nailers have an adjustment to controlmanage the for
- If you are planning on delivering a lot of nails, you will want to think about the nail capa

Finally, be sure you look at the reviews for the nailer you are thinking about getting. Resear
