Article Body:

Last year I managed to get a trip out to Florida to do some diving, Being quite an experienced

The Oriskany Reef is an artificial reef made from and old air craft carrier its quite a huge

The Oriskany reef lies off the coast of Florida and is not recommended for novice divers as by

Having said that it is that far down you do not have to go down very far to get a good view of

Although I'm an experienced Wreck Diver I did not plan to go into this wreck merely to observe

These artificial reefs are going to transform the diving industry and also do a lot for the oc

By replenishing and conservation of existing reefs we may enjoy the spectacular array of life

This would require technical diving skills and a lot of good experts to get advice from before

The Oriskany when it was reefed landed in the upright position as this is an air craft carrier

I have dive many wrecks some of the best ones can be found at Scapa Flow in Shetland Islands.

You sometimes think about flying but that cuts down the amount of diving you can do, as most o

I hope to find some more artificial reefs to explore and take more photos and keep a good reco
