Word Count:

494

Summary:

The following are some wakeboarding tips to make your riding a whole lot easier. Keep them in

Keywords:

wakeboarding, kneeboarding, water sports, water skiing

Article Body:

So you have already experienced this relatively new sports craze? The following are some wake

- Make sure that you are comfortable with whatever foot you placed forward. Sometimes, just s
- Put your arms on each side of your front knee. Your weight should be about 60% forward on t
- Squat down as much as you can to easily swing to an upright position when close to the board
- Keep the board on its side while in the water. Relax and let the boat cause the board to sw
- Don't get too fast. Someone said "give him full throttle until he's up"; this is one bigges
- Go for a short rope, attached to a ski pylon if possible. It helps. After you're up, it's
- Once you get used to staying up on the board and getting out of the water, you will probably

Drivers

- Gradually increase your speed. It's so hard for a beginner to keep his balance on this new
- Stay slow. After the newbie gets up, keep the speed under 16 mph. This requires a good dri

In addition to the above tips, always read and listen to what the expert riders have to say ab
