snowboard, snowboarding, snowboard gear reviews, snowboard reviews, snowboard tips, how to snow

Article Body:

Find a hill with tons of snow and follow these simple instructions on how to build your own snow

Here's What You Need To Do:

1. Find a location. Preferable somewhere that starts with a nice easy slope and then gets
2. Break out the snow shovels, there is light weight ones available. Pile up the snow.
3. Snowboards can act as good scaffolding at the front of the jump.
4. Pack down the snow, your board will do best, just hang on to the bindings and start sm
5. Don't forget the run in...Make sure you have a clean approach. There's nothing like ha
6. The test run. Usually the sucker friend (spends half the year in casts). Fine tune it

Tips:

1. Try to hit from different spots and figure out the smoothest landing zone.
2. The best way to learn new tricks is by practice. Just keep hitting them and hitting th
3. These instructions are not recommended to use while in resorts as they usually have on

What You Will Need:

- Shovel
- Hill
- Snow
- The Need To Ride
