Article Body:

Right after you buy a kayak, you'll find you also need to buy a car rack to carry it. There are

People who are shopping for car racks notice right away that there are many to choose from. There are

All three types of kayak mountings are efficient, depending on the vehicle and the kayak.

Vertical Support System

The vertical support system normally goes on the rear of the vehicle and is usually used on vans and SUVs.

Saddle System

The saddle system has four padded holders attached to the vehicle for the kayak to sit on. Straps are used to secure the kayak.

Roller System

The roller system is similar to the saddle system except it has wheels that make loading and unloading easier.

People usually travel with their kayaks on the roof. Each system works reliably with proper installation.
