Summary:

Here is the easiest way to create your own fun, flyable kite.

Keywords:

how to build a kite, how to make a kite

Article Body:

Your Fast Guide to Kite-Building

Here is the easiest way to create your own fun, flyable kite.

GATHER some garden twine; scotch tape; a sheet of strong paper (about 102 x 102 cm,); two sticks

MAKE A CROSS with the two sticks, with the larger one running vertically and the shorter one horizontally

WITH THE PAPER laid flat, place the frame face down on top. Cut around it (Leave around 2 cm from the edges)

CREATE A TAIL: Do this by tying a small ribbon about every 10 cm on the length of string. Attach the tail to the bottom of the kite.
Here your kite is ready to roar in the skies.
