Sometimes you get so excited about working on a project that you forget about the fundamentals.

Building a horse round pen is no different - there are fundamental steps to follow to make sure

One of the first steps in building a round pen is to make sure that you have a layered base and

If you are extremely lucky, you will have a level piece of ground to work with and a sand base.

A properly constructed round pen base and footing resembles a layered cake. By sloping your base

The icing on this layered cake is the footing. Remember, the footing is what provides the support.

Depending on the material you use, you may need to replace it every so often as well. When you

So remember, when you start your round pen project, build from the bottom ~ up and you'll be o
