Article Body:

Though skateboards were around in the early 50's and 60's and actually very widely used back t

It wasn't until the 1970's that Frank Nasworthy, a surfer, developed a wheel made from urethan

The first skateboard parks from that time were mainly empty pools but lots of great moves and

In the 1990's the sport regained popularity and though it has had some fluctuations since it h

Over the years I've often heard it said that this sport wouldn't last. It was just a fad. But

Throughout these years there have been increases in the quality of boards and wheels but mainl

Then there's the Australian Bushpig, motorized skateboard (sort of), that does 20mph. Gotta ge

And the ultimate so far? That has to be Danny Way and his jump over the Great Wall of China. I
