<h3>Artificially Intelligent Law Dictionary </h3>

<p>Printed Legal Dictionaries have been fundamentally the same size ever since their inception

<p>Do the people that publish printed dictionaries simply pick and choose what law they want to

Dean's Law Dictionary is digital so we keep the old and add the new. We don't need to make do

<p>We have the digital advantage and we have combined that with advanced artificial intelligence

There is a law in relational dynamics that relates to how large a knowledge database gets over

<p>The Snell's law we are concerned with states that as a relational database encompasses more

Because of Snell's law, and the fact that we have been doing this for some time, our knowledge

Even so, this has resulted in a product that is second to none. Dean's is already the most
