Article Body:

Often times I hear my students asking: "Can I use a calculator?" My invariable answer is "No",

Well, I must admit that times have changed, and it seems it is now the right time to be in tun

For example, in a typical first year college Calculus class, it takes a great deal of effort t

Shouldn't we make an emphasis on the concepts rather than on the calculations? In mathematics,

The future of CAS should also include a way to use all this "intelligence" used to solve compl
