California schools

Article Body:

In June of 2006, superintendent of public instruction Jack O'Connell awarded \$150,000 in grant

Currently, there are numerous jobs in the healthcare industry for applicants with college and

These healthcare jobs are demanding; however, and require rich and rigorous core curriculums f

The funds ultimately are designed to help California schools students consider such careers. T

The fulfillment of each district grant requires:

- Development teams that consist of teachers, administrators, counselors, postsecondary
- District teams must attend the annual California Health Science Educators Institute, h
- Teams develop and submit a health science pathway strategic plan, as directed by the I
- A team approach is used in all facets of the California schools program;
- Districts and their teams also must submit to the California schools letters of commit
- California schools students must attend the California Health Science Education Instit

The funds for the new California schools program were made available through a partnership bet
