Mansell Report Update Offers New Challenges To British Care Providers

Word Count:

706

Summary:

The SHARED Approach is a clinical system that is in turn based on Positive Behavior Support and

Keywords:

Mansell Report Update

Article Body:

The second half of 2007 was a significant time for those who make and follow policy development

In reflecting on this latest report it is encouraging to note that everyone is agreed on the message  
for anyone else.

A Clinical Model...That works.

The SHARED Approach is a clinical system that is in turn based on Positive Behavior Support and

A Clinical Model ... that can be seen to work

Castlebeck, a well established service provider based in the north of England has now completed

Castlebeck Progress involves an approach similar to that of person centred planning. An individual  
Once the circle has agreed a profile of outcomes for the individual, measures are taken of each

This type of approach welcomes the Mansell Update and we are looking forward to using this as
