Article Body:

So, what needs to be done to ensure that a distance learning course is a success, in a nutshell

It is important that you research potential providers. Look at the range of courses they offer

Once you have selected your provider and course, you need to prepare. This means thinking about

Stakeholders, these, as in project management terms, are any people who have a legitimate interest

Planning: plan how, and when, and what with, you will study. Draw up a timetable, if this is necessary

Monitoring: monitor your progress on a regular, usually weekly, no less than monthly, basis. Update

Respond to changing circumstances. One of the most attractive features of studying by distance

At the end of a project, professional project managers make sure that they carry out a close down

Make sure that you have successfully completed all the assignments, passed all the examinations
