On October 4, 1957, Russia launches the first artificial satellite in history - Sputnik. To ma

In the 1950s, a tiny group of engineers was already planning trips to the moon. They were call

The most basic decision that should be made is about the flight. There are two possibilities.

In 1959, Houbolt says that both plans, Direct Ascent and Earth Orbit Rendezvous, will fail, be

"It was a vehicle about the size of an Atlas. Down at the Cape, it takes 3000 men, a launch pa
