Keywords:

improve memory, human memory, memory techniques

Article Body:

This article will review the use and potential of using mnemonics tactics to increase and improve

Working together, the principals of association, imagination and location can be used to generate

Association is the method by which you link a thing to be remembered to a method of remembering

Imagination in memory is used to create the links and associations needed to create effective

The third principal and the last one is location. Location provides you with two things: a color

So using the three fundamentals of Association, Imagination and Location you can design images
