Article Body:

Let's face it, the ability to read faster, and still comprehend what you're reading, is an essential skill.

There's no doubt, learning to speed read is probably the most valuable and time saving skill you can acquire.

Of course, some people will say you can do fine without knowing how to speed read. WRONG! You're missing out.

Just imagine being able to read a novel in less than half the time it takes you now, and knowing what you're reading.

Once you have become proficient at speed reading, you've prepared yourself to move with confidence in any situation.

Learning to speed read is not a difficult or painfully long process. In fact, a recently released book shows you how.

If you are a High School or College Student, read extensively for your work, like reading the textbook.
