Article Body:

When a person develops a stutter or a parent realises that their child is developing a stutter

The answer is many things can trigger someone starting to stutter. These are some of them:

It can be a traumatic event

It can run in the family

People may copy a friend at school who has a stutter and then it sticks

An over aggressive relative

Last year I had a female client who told me how she had developed a stutter. She was fluent un

She was apprehensive about the birth and her friends had been winding her up telling her how p

The day of the birth arrived and unfortunately the delivery was particularly hard and she was e

Not all people who stutter have it from an early age, another one of my clients was fluent unt

Many people who stutter have a parent or relative who has a stutter and they have picked up th

There are many stutter treatments now available from one to one speech courses or group course
