Article Body:

There are many people in the world who have problems with their communication. In this article

Why do people stutter?

There are many reasons people may develop a stuttering problem:

A traumatic event such as the loss of a relative

Someone in the family such as a parent may have had a stutter

The person who has a stutter may have copied a friend at say school who has a stutter and then

An over aggressive relative telling the person to spit their words out etc.

A while ago I had a female client who told me how she had developed a stutter. She was fluent

She was apprehensive about the birth and her friends had been winding her up telling her how p

The day of the birth arrived and unfortunately the delivery was particularly hard and she was e

Not all people who stutter have it from an early age, another one of my clients was fluent unt
