

Title:

Biodiesel The Alternative Fuel

Word Count:

316

Summary:

What Is Biodiesel?

Biodiesel is a fuel made from vegetable oils. Rapeseed and soybean oils are the most commonly

Then we have the waste vegetable oils which are byproducts from animal fats like tallow, lard

Keywords:

biodiesel,biodiesel processor,biodiesel kit,biodiesel fuel,biodiesel plant,biodiesel vehicle

Article Body:

What Is Biodiesel?

Biodiesel is a fuel made from vegetable oils. Rapeseed and soybean oils are the most commonly

Then we have the waste vegetable oils which are byproducts from animal fats like tallow, lard

Biodiesel is an environmentally friendly alternative to the petroleum diesel we use today which

Biodiesel however is old news in one sense because Dr Rudolf Diesel the inventor of the diesel

During a speech at the same exhibition he was quoted as saying "the diesel engine can be fed w

Biodiesel is a clean burning fuel which would reduce the carbon dioxide emissions of todays ve

The use of biodiesel is definitely becoming more popular in America and the UK, more and more

So to summarize some of the benefits of using biodiesel:

1. Biodiesel is an environmentally friendly fuel.
2. It is a clean burning fuel.
3. It will reduce carbon dioxide emissions
4. Biodiesel is made from waste vegetable oils
