Pearl Formation

Pearls are considered as organic gems, as they are created by living creatures. It is character

The natural process starts when a mollusk encounters an irritating microscopic object trapped

Pearl Distinction

Do you know how to distinguish a freshwater from a saltwater pearl? They may look somewhat si

Jewelers can tell if the pearl is natural or cultivated by running an x-ray in the gem lab. I

Pearl Value

The value of the pearl depends upon its luster, size, color, lack of flaw and good symmetry.

Definitely, the bigger the pearl the more expensive it is. Also, if the shape is perfectly ro

Pearl Care

Pearls are made into necklaces, bracelets, earrings, pendants and even rings. It is a gemston

1. Put your pearls on after applying your make-up, perfume and lotion.
2. Wipe it with a soft cloth (lint-free) as you take them off. This cloth may be dry or damp.
3. If it gets dirty, clean your pearls with mild soap and water. Never clean it with solution
4. Do not use abrasive cleaners or rough cloth. Both can wear away the nacre coating fast.
5. Do not store pearls beside other jewelries, as they can be scratched easily. Keep it in a
