Article Body:

Cancer is the second largest cause of death in America. Thousands die every year from the disease.

It was the Lance Armstrong foundation that came up with the novel idea of selling rubber bracelets.

Rubber cancer bracelets in pink color are worn in support of breast cancer patients. They are also popular.

The rubber bracelets are usually made of synthetic rubber or silicon gel. They are also popular.

The rubber cancer bracelets not only provide financial support for cancer research, but are also popular.

Though the yellow live strong bracelets and the pink cancer bracelets are the most popular, rubber bracelets are also popular.
