Article Body:

Accidents do happen unexpectedly, but they can be avoided.

However, despite the fact that a lot of people are trying their best to avoid it, still, many

In 2003 alone, statistics show that over 6 million car accidents have been reported in the Uni

So, where does the problem lies? Is it on the driver, the car manufacturer, the government, or

However, in the event that accidents happen, the only way to solve the mishap is to deal with

1. Emergency numbers in one's mobile phone are extremely important.

People just don't realize this yet, but the emergency numbers stored in their mobile phones ar

Surveys show that people who usually survive in accidents are those who were attended to immed

2. Panic is the number one killer in an accident.

The reason why many people do not survive in an accident is because they tend to panic first.

3. Prevention is still the number one remedy.

Today, car accidents are currently the top most causes of death, usually within the age bracke

And so, it is important to observe traffic rules and regulations so as to prevent road acciden
