

Title:

Travel, Global Warming And Carbon Offsets.

Word Count:

810

Summary:

Are carbon offsets the answer to the pollution we cause by holiday travel? Or are they merely

Keywords:

travel, carbon offsets, global warming, climate change

Article Body:

With the growing awareness about global warming has come an increasing pressure on the travel  
People, however, ignore these facts. Many feel that holiday travel is a luxury and therefore d  
This is where the moral pressure to plant trees, buy carbon credits and offset our carbon foot  
Other offset schemes, such as buying energy efficient light bulbs and stoves for the developin  
But there is now a burgeoning industry of offsetting firms, mostly in the US and UK, each happ  
Many of the schemes - be they planting trees, using bio fuels, or installing solar power - wou  
Wind farms, solar panels, installing energy efficient light bulbs, low flow showers and energy  
Certainly greater clarity is needed in the offset industry and people need to realise that it  
The most environmentally friendly thing would be to stop flying and stop going on holidays. Th
