Don't Sweat It: Cooling System Maintenance is Easy

Article Body:

When AAA reports that millions of vehicles overheat each year, it's clear that people are apprehensive.

Compounding the anxiety is the overwhelming number of coolant formulas and colors on store shelves.

But now, drivers no longer need to worry; there is a product on the market that makes cooling system maintenance a breeze.

New Prestone All Makes All Models Extended Life Antifreeze/ Coolant can be used in all car and light truck engines.

"Advancements in vehicle technology caused antifreeze manufacturers to concoct a variety of formulas and colors.

The Prestone All Makes All Models Extended Life Antifreeze/ Coolant is available in both full strength and pre-mixed formulas.

When using the concentrated formula to flush and fill a vehicle, motorists should consult the vehicle's owner's manual.

In between these services, motorists should top off the system with a premixed formula, which is the easiest to use.

"Cooling system maintenance no longer has to be daunting," O'Donnell said. "Forget about color and formulas."
