

Title:

Hot Weather Affects the London Tube

Word Count:

320

Summary:

The soaring temperatures on the London Tube over the summer months have been a problem for some

Keywords:

water, cooler

Article Body:

The soaring temperatures on the London Tube over the summer months have been a problem for some system. The trial, which starts this summer, aims to make it cooler for passengers on platform

But this is only a trial to be tested this year and it is far from being put into work as well

Meanwhile the temperatures in the deepest tunnels, reach 30C (86F) in summer.

These changes might affect the London Tube in a drastic way. Some of the Tube lines might be closed

About 1,000 London Tube passengers were trapped for nearly two hours when three trains were held
