Article Body:

How horrible would it be one day to wake up and realize you don't have any headlights? I think

Your lights are one of the parts that will last you a long while. But since they are on the ex

It is really simple and easy to replace Ford parts, especially the lights. The reason for that

But let's go back to your Ford lights. It's quite easy to change them yourself, just follow my

First remove the exposed plastic or metal trim around the housing to get the headlight ring an

Once you remove the retaining ring the headlight will be free. Just unplug the wiring connecto

Then plug back the connector into the back of new headlight then place it in the mounting base

Turn on the new headlight to see if it is working. If it doesn't come on it probably means the

You next step would be to replace the retaining ring. But again, be careful about the screws.
