Article Body:

Car experts say that one of the easiest ways to steer clear of some serious road hazards is to

"Using the wrong coolant can affect the entire cooling system," said automotive expert Dr. Dav

Using the wrong kind of coolant can lead to radiator or water pump damage and even cause break

To avoid road bumps, drivers should:

&#8226; Use a coolant product that offers the right chemistry for each vehicle model;

&#8226; Check tires for worn tread or improper air pressure;

&#8226; Check to make sure belts aren't worn;

&#8226; Make sure hoses are attached properly.
