The story of Porsche could begin in 1950 with the introduction of the Porsche 356 to the United States.

Ferdinand Porsche showed indications of his technical genius at the age of 18 when he wired the first prototype of a car.

Keywords:

porsche, automobile, car,

Article Body:

The story of Porsche could begin in 1950 with the introduction of the Porsche 356 to the United States.

Ferdinand Porsche showed indications of his technical genius at the age of 18 when he wired the first prototype of a car.

When he worked for Mercedes-Benz, he helped to create the SSK series, while for NSU, he designed the W123.

The elder Porsche and his engineers were busy. They developed for Steyr, a luxury sedan in Austria.

The company created its most well-known designs for NSU and Zundapp. Prototypes were characterized by their simplicity.

After World War II, the Porsche Company began to create the vehicles that now bear the name of Porsche.
