

Title:

Unleash The Horses With A Performance Exhaust System Upgrade

Word Count:

775

Summary:

Why should I buy a performance exhaust system? Because your vehicle has a team of horses bayin

Keywords:

Performance Exhausts, Mufflers, Tips, Catback Exhaust, Diesel Exhaust

Article Body:

Stock exhaust systems are designed simply to provide a conduit for spent gases to move from yo

- Serious horsepower and torque gains
- Distinctive, growling exhaust tone
- Improved fuel economy

Horsepower and torque

In case you skipped out on Auto Shop back in high school, I am here to give you a quick lesson

First, the cylinder sucks a mixture of oxygen and fuel (gasoline or diesel) into its chamber,

That's where the exhaust system comes into action. The spent gases are exhaled, traveling out

The problem with stock exhaust systems is that they are not optimized for the best possible fl

Quick-installing, bolt-on performance exhaust systems improve your power by:

- Drastically reducing restrictions in your pipes
- Increasing the puny diameter of stock pipes
- Improving engine scavenging

The Growl

With a performance exhaust system, you not only feel the power every time your foot hits the p

When it comes to the sound of your vehicle, the muffler has the most impact. Of course, you ca

Fuel Economy

Unless you've got your own oil derrick churning out barrels of Texas Tea in your backyard, cha

That's because the same overall improvements that lead to greater performance are improving yo

I'm convinced and I hope your are as well that the exhaust system upgrade that you end up with
