

Title:

You Can Improve Your Car's Power!

Word Count:

491

Summary:

More power and better fuel mileage go hand in hand. Read on to discover four performance parts

Keywords:

Hypertech programmer, K&N filters, AEM cold air intake, performance exhaust, Ford, Chevy, Dodge

Article Body:

I can hear it now from the Prius loving, gas sipping, and bike riding crowds: a more powerful

1. Power chips and programmers. Whether you replace your car's computer chip or enhance
2. Reusable air filters. Now this is a part that the tree huggers love: air filters which
3. Cold air intakes. That growl coming from underneath your hood is your engine telling you
4. Performance exhausts. Yes, your stock exhaust system just doesn't cut it. For starters

What many motorists do not understand is that some stock parts are not the best parts for your

Of course, the big question is this: aren't performance parts expensive? They can be if you do
