Article Body:

If you love to camp, hike, fish, water ski and enjoy the great outdoors; chances are there will

Here are some terms you should be familiar with and what you need to check. The Base Curb Weig

The GVW must not exceed the GVWR which can be found on the safety Compliance Certification lab

There are two different types of hitches on the market. A weight carrying hitch is common for

The weight distributing hitch uses a hitch platform to distribute the tongue load to all the w

Besides the GVWR and the correct type of hitch, you also need to make sure your braking system

Electronically controlled brakes provide both automatic and manual control of the trailer brak

The trailer will also need to be equipped with trailer lights that meet government regulations

Safety chains should always be used when towing. They provide a connection between the trailer

A trailer is a great investment. It will take you from the mountains to the valleys and from t
