Word Count:

546

Summary:

Trailers are of significance and are used for many purposes. They are widely used to lift heavy

Keywords:

bike trailer, car hauler, dump trailers, tandem axle trailer, utility trailer,

Article Body:

Trailers are of significance and are used for many purposes. They are widely used to lift heavy

- Single axle series- include bike trailer and ATV hauler, mostly used for off-road or turf applications.
- Tandem axle trailer series- includes both general duty and heavy duty range of trailers. Tandem axle trailers are designed to transport heavy loads.
- Auto and flatbed series- includes tandem axle trailers with open flatbed design available in various configurations.
- Equipment series- includes hydraulic tilt bed vehicle haulers and heavy equipment haulers.
- Cycle series- includes bike trailer series, specially designed with Equalizer Torsion Axles, for a smooth ride.

There are also specially designed trailers, including:

- Fleet neck trailers- designed specifically for heavy duty vehicles. These trailers are equipped with heavy duty hitches.
- Work horse trailers- include dump trailers. There are seven different models of dump trailers available in the industry.
- Ranger trailers- include economy trailers. There are seven different models available in the industry.

The trailer industry demands the use of alkyl-based enamel paints on the trailers since they are durable and long-lasting.

Diamond C Trailers presents you with a high quality range of trailers you can bank upon. Every trailer is built to last.

For more details on various trailer series, including dump trailers, utility trailers, bike trailers, car haulers, and more, please visit our website.
